

## Join our Clean Growth Forum

We cordially invite you to join us for a discussion on the global climate challenge with representatives of the public and private sectors of the U.K. and Japan.

Rio Tinto will host the event “Clean Growth - Enablers for a Low Carbon Economy -” on Tuesday, 8 December. Originally scheduled for February 2020 as part of UK in Japan Clean Growth GREAT Week, the Forum will now be held online in the interest of protecting your health and safety.

As we approach the 5<sup>th</sup> anniversary of the Paris Agreement, a new UN report says that the response to the COVID-19 crisis has had a temporary impact on reducing emissions yet irreversible climate change impacts are increasing. The UK was the first major economy to legislate for net zero emissions and now Japan has joined the 70 countries committed to achieving carbon neutrality by 2050. The Forum will hear from representatives of government and leading companies in the U.K. on addressing climate change-related issues from different viewpoints including technology, policy and materials – and how partnerships are the only way to truly tackle climate change.
